## **COMPLETE SERVICE**

The strength of Sundplast lies in the fact it is a modern flexible company that can provide its customers with a rapid, comprehensive service. In addition to the manufacturing of furniture fittings, we can also offer a sub-contracting service for plastic parts. With 20 modern injection moulding machines and CNC robots we are able to guarantee good capacity and quick delivery. And our own workshop ensures that the injection moulding tools are carefully maintained.

We make no compromises where the materials we use are concerned. From initial machining right through the production process to packing and delivery, all our products are subjected to quality and environmental controls at every stage. You are kindly invited to discuss your ideas with us!

## **INJECTION MOULDING THAT REQUIRES THAT LITTLE EXTRA**

The interaction between Sundplast's quality assurance system ISO 9002, CAD CAM design, expert staff, modern machinery and traditional craftsmanship means we can also produce complicated products.

## **BESPOKE DESIGN**

AB SUNDPLAST is constantly developing new handles and furniture fittings.

A sound knowledge of the intricacies of design is just as important as a sound knowledge of the intricacies of production. That is why we design the products in our range ourselves, and why we also make our own injection moulding tools, with a view to ensuring top quality production. CAD CAM is used for the design and manufacturing of our own injection moulding tools. We have a wide range of designs. Call us, we may have just the product you're looking for. If not, we can assist with the design, tooling and manufacturing.

## **ENVIRONMENT**

The interaction between Sundplast's environmental management system is a guarantee for that a proper evaluation has been proceed in all stages of products. Sundplast is certified according to the environmental system ISO 14001

### **CENTRALLY LOCATED SUPPLIER TO THE FURNITURE INDUSTRY**

Sundplast's excellent location in southern Sweden facilitates contact with other EU countries and the rest of Europe. Sundplast specialises in injection moulding of handles, knobs and furniture fittings. Modern technology has presented almost unlimited potential when selecting design, colour and material combination. In addition to an expanding standard range, we also offer total system packages.

---

### **A WIDE RANGE OF STANDARD COLOURS**

Modern technique gives almost unlimited possibilities to choose different shapes, colours and material combinations.

# ALL UNDER ONE ROOF!

Sundplast has all the necessary resources under one roof. The company manufactures all types of injection moulding tools using modern CAD CAM technology. Sundplast is certified according to the quality standard ISO 9002, environmental standard ISO 14001 and are a member of The Swedish Plastic industry Association.

Over 20 injection moulding machines up to 2500 kn. guarantee rapid delivery in a wide range. We also function as subcontractors on a wide range of assignments, including quality control, wrapping, marking and ultrasonic welding
